Light Grey

Black

When a design concept is boiled down to the essentials of comfort, utility and aesthetics, it becomes foundational. And from this foundation, it can shape-shift endlessly, adapting its form and function to various needs – while remaining true to its identity. Such is the story of the Harbour Chair's evolution.

Originally conceived to serve a broad range of needs at Menu Space, MENU's showroom/creative co-working space/café in Copenhagen, the Harbour Chair design has expanded to respond to all kinds of needs in private and public spaces. The latest rendition – the Harbour Side Chair – adds a new chapter to the Harbour story.

Designed to be paired with any of the existing Harbour Chair bases, the Harbour Side Chair offers new possibilities for retail and contract use. With its slender, compact shell, the design fits into more spaces and under more tables. The new shell replaces armrests with gently curved sides that retain the sense of being cradled and supported while inviting complete freedom of movement.

Beautiful on their own or alongside Harbour Chairs and Harbour Column Tables, the Harbour Side Chairs continue the collection's elegant minimalism and ergonomic, comfort-driven experience.

The Harbour Side Chair shells are available in a range of leather and textile upholstery and in numerous unupholstered versions. The bases are crafted from wood or steel, with the steel versions available in bar, counter, or swivel base variants. The multitude of personalization options, in other words, allows the Harbour Side Chair to make itself useful and at home in any environment.

Once you've chosen the Harbour Side Chair shell style that will be cradling and supporting your body, you can now also choose a clover-shaped swivel base so you can spin around as needed – and roll around as wanted. The base is available with either swivel, swivel w/return or swivel w/casters in three finishes – polished aluminum or powder coated aluminum in black or light grey. The Harbour Swivel Side Chair is available with textile and leather upholstery or with a bare shell. MENU's upholstered

chairs are priced in three or four different categories, within textile or leather. Prices vary depending on the textile or leather you select. MENU offers various Harbour Swivel Side Chair variants available for expedited delivery.

About the Designer

Founded in Copenhagen in 2008 by Jonas Bjerre-Poulsen and Kasper Rønn, Norm Architects specialize in residential architecture, commercial interiors, industrial design, photography and art direction. Today, the group regularly collaborates with MENU, helping to drive the evolution of the brand and its products.

Norm Architects' name reflects the group's emphasis on the importance of drawing inspiration from norms and traditions within architecture and design – particularly the Scandinavian design principles of timeless aesthetics and natural materials, and the modernist values of restraint and refinement. Guided by these principles, Norm Architects produce design that unites good materials and craftsmanship, while embodying beauty, traditions, history and, most importantly, timeless simplicity, where there is nothing more to add or take away.

Notes to Editor

MENU is a Scandinavian design brand with a simple purpose: to make the world more beautiful, less complicated, and a little bit nicer to wake up to.

Since 1978, we have harnessed the skills of top designers and craftspeople in Scandinavia and around the world to create contemporary design that is clean, clever and natural. These principles culminate in an aesthetic we call soft minimalism. Together with our Danish Modernist roots, this concept serves as a foundation for our designers as they find new ways to unite our heritage with a fresh vision for modern living, reimagining mid-century modern values to bring irresistible new ideas to people and spaces. Your chosen objects will be with you for years to come. We know every decision you make is important, and we want nothing more than to bring joy, beauty and ease to the process of designing your space. It's why we exist and what we do best.
